LinkedIn: linkedin.com/in/yogeswari-boreddi-2161022a7

## Professional Summary

Business Application Developer with hands-on experience designing and delivering enterprise workflow solutions across the Zoho ecosystem, REST APIs and SQL. Experienced across CRM and pricing, sales and fulfillment workflows, inventory control, vendor procurement, employee assets and initiative tracking. Proficient in automating manual processes, integrating third-party systems, enforcing data validation and resolving application issues efficiently. Collaborates closely with business stakeholders to translate requirements into reliable, user-friendly applications. Working knowledge of Python, JavaScript, React.js, Node.js, PostgreSQL, AWS and DevOps fundamentals, with a strong interest in Large Language Models (LLMs) and AI-powered business automation.

## Core Strengths

- **Workflow Automation:** Automating manual processes through workflows, approvals and notifications.
- **System Integration:** Integrating Zoho applications with external platforms via REST APIs, webhooks and JSON.
- **Data Integrity:** Implementing validations and checks so records, quantities and balances remain accurate.
- **Troubleshooting:** Performing root-cause analysis of lookup, subform and numbering issues and delivering permanent fixes.
- **AI Orientation:** Exploring language-model-based automation to make business tools more useful.

## Professional Experience

### Business Application Developer — Jul 2026 – Present
*VSInterconnect India Pvt. Ltd.* — *Bengaluru, Karnataka*

- Designed and maintained business applications using **Zoho Creator, Deluge and the Zoho suite**, contributing to **6 documented application projects**.
- **Configure forms, subforms, workflows, approval processes, reports and dashboards** that improve team productivity.
- Delivered application functionality across **7 business areas**: CRM, pricing, fulfillment, inventory, vendor procurement, employee assets and digital innovation.
- Apply business rules for stock tracking, transaction handling, supplier procurement and asset allocation.
- **Integrate applications with external services using REST APIs**, webhooks, JSON and scheduled data synchronization.
- Investigate application issues, refine workflows and collaborate with teams to convert requirements into working solutions.
- Improve application reliability through data audits, workflow reviews and regular enhancements.

### Junior Zoho Developer — Jan 2026 – Jun 2026
*NPK Business Solutions* — *Bengaluru, Karnataka*

- Developed business applications in Zoho Creator and CRM, using Deluge to address client requirements.
- Configured forms, subforms, validations, email notifications, approval flows, reports and dashboards.
- Integrated Zoho with external systems via REST APIs and webhooks, processing JSON responses.
- Investigated and corrected integration, lookup field, subform and transaction numbering issues.
- Monitored scheduled automations and data synchronization to keep routine processes reliable.

## Key Projects

### 1. CRM and Price Management Application — *Zoho Creator, Zoho CRM, Deluge*

- Configured CRM and pricing workflows to centralize customer details, sales activity and quotations.
- Implemented validations and automation to improve data accuracy and reduce manual effort.
- Developed pricing calculations that map customer requirements to the correct quotation.
- Enhanced reports and investigated issues, enabling sales and pricing teams to work more efficiently.
- Connected customer requirements with pricing information so the team could prepare quotations using consistent product and rate details.
- Supported a clearer view of customer activity and quotation progress through centralized CRM records.

### 2. Order Management Application — *Zoho Creator, Deluge, REST APIs*

- Developed an end-to-end system that follows each customer request from initial entry through subsequent stages.
- Set up forms, subforms and field-level validations to manage transaction details and related records accurately.
- Applied business rules to keep records consistent and transaction processing reliable.
- Improved workflow reliability and added reports and automation to accelerate progress tracking.
- Linked related request details so users could follow progress from one place.
- Used validations to reduce incomplete or inconsistent request details during data entry.

### 3. Inventory Management System — *Zoho Creator, Deluge, Inventory Workflows*

- Tracked incoming items, stock movement and purchase records to provide real-time stock availability.
- Implemented logic for stock updates, quantity checks and inventory transactions to keep figures accurate.
- Designed forms, subforms, reports and automated updates to monitor items and identify stock discrepancies.

- Resolved inventory issues and strengthened validations to prevent incorrect quantities and inconsistent stock data.
- Improved visibility into stock availability by keeping incoming items, purchases, and stock movements connected.
- Used automated updates and reports to help users review inventory records and identify discrepancies.

**4. Production System** *Zoho Creator, Deluge, Vendor Purchasing*

- Developed an application enabling the production team to manage supplier-related products and arrange procurement when stock is unavailable.
- Configured forms and subforms to capture supplier details, required items and quantities.
- Validated requirements against available inventory stock to determine procurement needs before placing supplier requests.
- Developed and refined reports to monitor supplier transactions, product quantities and stock availability.
- Helped the production team compare required quantities with available stock before deciding what needed to be purchased.
- Maintained clear vendor and product details so purchasing requirements were easier to review.

**5. Employee Asset Management System** *Zoho Creator, Deluge, Asset Tracking*

- Maintained comprehensive records of company assets and employee assignments.
- Designed workflows for asset issuance and return, with quantity validation.
- Updated records to give users quick visibility into assigned assets, returns and accurate asset details.
- Added validations to reduce incorrect allocations and improve traceability of asset activities.
- Maintained assignment and return details so users could check the current status of company assets.
- Supported more consistent asset records through structured forms and workflow-based updates.

**6. Digital Innovation Management System** *Zoho Creator, Workflow Automation*

- Established a central platform for initiative details, tasks, milestones and records throughout the delivery lifecycle.
- Tracked budgets, release records and deployment history for each initiative.
- Maintained structured records for change logs, risk registers, test plans, subscriptions and bug reports.
- Improved forms and workflows to ensure consistency, progress tracking and clear tracking of technical changes.
- Brought delivery tasks, milestones, risks, testing information, and bug reports into a structured application.
- Enabled teams to track initiative updates and deployment records throughout the delivery lifecycle.

## Soft Skills

- **Communication:** Explaining technical information clearly and understanding requirements from business users.
- **Teamwork:** Working collaboratively with developers, business teams and other stakeholders.
- **Analytical Thinking:** Breaking down problems, reviewing information and identifying practical solutions.
- **Adaptability:** Learning new tools and adjusting to changing project and business needs.
- **Time Management:** Organizing tasks and balancing priorities to meet agreed timelines.
- **Attention to Detail:** Checking data, workflows and application behavior carefully.
- **Ownership:** Following issues through investigation, implementation and testing.

## Skills

| | |
|---|---|
| **Zoho Technologies** | Creator, CRM, Books, Inventory, Desk, People, Projects, Analytics, Zoho One, Deluge |
| **Business Applications** | CRM Customization, Workflow Automation, Approval Processes, Inventory, Orders, Vendor Purchasing, Asset Management, Reports and Dashboards |
| **Programming** | Python, JavaScript, Java, SQL |
| **Web Development** | HTML5, CSS3, React.js, TypeScript, Node.js |
| **API Integration** | REST APIs, Webhooks, JSON, Third-Party Integrations, Data Synchronization |
| **Databases** | PostgreSQL, MySQL, Relational Database Concepts |
| **Cloud and DevOps** | AWS Fundamentals, Docker, CI/CD Fundamentals, Cloud Deployment, Version Control |
| **Tools** | Git, GitHub, VS Code, Postman |
| **Areas of Interest** | Large Language Models (LLMs), AI Applications, AI-Driven Workflow Automation |

## Education

**B.Tech – Computer Science and Engineering** **2022 – 2026**
Jawaharlal Nehru Technological University Anantapur (JNTUA), Andhra Pradesh 85%

**Intermediate – MPC** **2020 – 2022**
Sree Bharathi Junior College, Andhra Pradesh 60%

**SSC** **2016 – 2020**
Z.P. Girls High School, Andhra Pradesh 98%

## Certifications

AWS Cloud Practitioner Essentials – Internship Studio | Cybersecurity Fundamentals – IIDT Team | Java Full Stack Development – Rooman Technologies | Frontend Web Development – IIDT Team | TCS Young Professional Course – offered by TCS Career Edge

## Publication & Languages

**Publication:** The Incredible Journey of DevOps – The Story of Innovation and Collaboration, published on Medium (medium.com/@borrediyogeswari).

**Languages:** Telugu (Native), English (Professional), Hindi (Conversational), Kannada (Conversational).
